ABOUT

I'm a proud student of Ingeniería informática at Instituto Tecnológico de Durango in semester 10. I love technology, software development and user experience design. I Also like to propose new ideas and strategies to obtain the best and most efficient result possible, always trying to enjoy the process.

INTERESTS

Front-end development and UX design are topics that interest me a lot, I'm always looking for new information about them and I like to use these subjects to create web pages with a design that users can understand easily.

Apart from being an engineer, sports are something I love, like go jogging, lifting weights and playing soccer and basketball. I also enjoy listening to music, dancing and playing the saxophone.
